The Gettysburg Campaign: Context is Key

Before diving into the three-day battle itself, understanding the preceding Gettysburg Campaign is crucial. The USAWC guides effectively establish this context. The Confederate Army of Northern Virginia, under General Robert E. Lee, aimed to invade the North, hoping to win a decisive victory that would potentially force the Union to negotiate a peace favorable to the Confederacy. Lee's strategy involved drawing the Union Army of the Potomac into a battle on ground of his choosing.

This campaign involved numerous smaller engagements leading up to the main clash at Gettysburg, all carefully dissected in the War College's detailed analysis. Understanding this lead-up is essential to grasping the strategic decisions made during the battle. The conflicting objectives and the evolving operational situation are expertly laid out in the publications, showing how the campaign itself shaped the battle's unfolding.

Analyzing the Battle's Three Days: Tactical Masterclass

The USAWC's study of Gettysburg meticulously examines each day of the battle, highlighting the tactical decisions, their implications, and the ultimate consequences. Day one, for example,

focuses on the initial skirmishes and the Union army's scrambling to establish a defensive line. The analysis goes beyond a simple description of troop movements; it evaluates the impact of terrain, the effectiveness of different units, and the strategic implications of the initial encounters. Day two showcases the critical maneuvering and the fierce fighting along Cemetery Ridge and Little Round Top, with a particular emphasis on the Union's successful defense against repeated Confederate assaults. Finally, day three culminates in the catastrophic Pickett's Charge, a tactical blunder that ultimately doomed Lee's invasion. The analysis will dissect the factors leading to the charge's failure – from artillery preparation to the effectiveness of the Union defense. The USAWC guides emphasize the importance of understanding the tactical choices at each stage of the battle to comprehend the overall outcome.
