FAQ

Q1: Where can I find past GCSE maths papers?

A1: Many exam boards' websites (e.g., AQA, Edexcel, OCR) provide access to past papers and mark schemes. You can also find them through online educational resources and tutoring websites. Remember to check the specification to ensure the papers are relevant to your exam board and syllabus.

Q2: What if I struggle with a particular topic?

A2: Don't panic! Identify the specific area you're struggling with and seek help. Consult your teacher, tutor, or utilize online resources like Khan Academy or YouTube tutorials. Break down the topic into smaller, manageable chunks and work through them systematically.

Q3: How many past papers should I attempt?

A3: There's no magic number, but attempting at least several past papers is recommended. The more you practice, the more familiar you'll become with the question styles and the

better you'll become at time management.

Q4: Are calculators allowed in the GCSE maths foundation tier exam?

A4: This depends on the specific exam board and paper. Check your exam board's regulations carefully. Generally, calculators are allowed in some parts of the exam, but not others. Ensure you are familiar with your calculator's functions and capabilities.

Q5: What is the difference between the foundation and higher tier papers?

A5: The foundation tier covers easier topics and generally aims for grades 1-5. The higher tier covers more advanced concepts and aims for grades 4-9. The choice of tier is usually made based on your teacher's recommendation and your current mathematical abilities.

Q6: How important is showing my working?

A6: Showing your working is extremely important. Even if you get the final answer wrong, you can still earn partial marks for demonstrating your understanding of the method. Clear, structured working makes it easier for the examiner to follow your thought process and award marks accordingly.

Q7: What should I do if I run out of time in the exam?
