Frequently Asked Questions (FAQ)

Q1: How often should I replace the filters in my Kaeser CSD 125?

A1: The frequency of filter replacement depends on the operating conditions and the air quality. Refer to your Kaeser CSD 125 manual for the recommended replacement schedule. Generally, it is good practice to inspect filters regularly and replace them when noticeably dirty or clogged. Neglecting filter maintenance can lead to reduced efficiency and potential damage to the dryer.

Q2: What is the typical lifespan of the desiccant in a Kaeser CSD 125?

A2: The lifespan of the desiccant depends on factors such as operating hours, ambient conditions, and the quality of the incoming compressed air. The Kaeser CSD 125 manual provides an estimated lifespan, but regular monitoring of the dew point is crucial. A gradual increase in dew point indicates the desiccant is nearing the end of its life and requires replacement.

Q3: What should I do if my Kaeser CSD 125 displays an error code?

A3: Consult your Kaeser CSD 125 manual for an explanation of the error code. The manual will provide troubleshooting steps or recommend contacting a qualified service technician if the problem persists.
