Periodic Maintenance (Monthly/Every 1000km):

Regular oil changes keep your engine clean and prevent premature wear. Pay close attention to the oil filter replacement as well.
- **Air Filter Cleaning/Replacement:** A clean air filter ensures optimal engine performance and fuel efficiency. Clean or replace it according to the manufacturer's recommendations.
- **Chain Cleaning and Lubrication (if applicable):** Thoroughly clean the chain and lubricate it properly.
- **Visual Inspection:** Conduct a comprehensive visual inspection of all components, checking for any signs of damage, wear, or leaks.

Major Servicing (Every 5000km/Annually):

- **Spark Plug Replacement:** Replace the spark plug according to the recommended interval. A worn-out spark plug can negatively impact engine performance and fuel efficiency.
- **Valve Clearance Check (if applicable):** Some models may require periodic valve clearance checks and adjustments. This should be performed by a qualified mechanic.
- **Carburetor Cleaning/Fuel System Inspection (for carburetor models):** Ensure the carburetor is clean and the fuel system is free of obstructions. This task can be challenging and often requires professional assistance.
